

MATTELI GROUP

Pardubice 5.3.2026

MATTELI Group a.s. has acquired the Rakovník-based logistics company ANEXIA s.r.o.

The transport and logistics group MATTELI Group (MG) has acquired the Rakovník-based company Anexia s.r.o. The transaction was subject to approval by the Office for the Protection of Competition of the Czech Republic.

Anexia has storage capacities of approximately 50,000 m², operates approximately 100 vehicles for domestic and international transport, and also runs an authorized service center for the DAF, Tatra, Ford, and PANAV brands. The company employs 560 people.

“The acquisition of Anexia gives us the opportunity to offer logistics services to customers across the MATTELI Group. We see entering this segment as key to the further growth of the entire group,” said Roman Šmidberský, owner and founder of the MATTELI Group.

The previous owners of Anexia explain the sale as a natural step in the company’s development.

“We have been with Anexia for more than 35 years and have come to the conclusion that we are no longer able to significantly develop the company. We discussed this issue for a long time and considered when the right moment for the sale would be. We agreed that it would be appropriate to take this step at a time when the company is in very good shape, operating stably, and still growing. And that is right now,” said seller Luboš Čermák.

“A Czech company with a clear ownership structure was selected, which plans to continue the company’s activities in their current form. We believe that Anexia will function even better and on a larger scale under its new owner,” added co-owner Pavel Kopřiva.

The MATTELI Group operates in five European countries and runs approximately 800 vehicles of its own. The group is owned by Roman Šmidberský through Matteli Solutions a.s.

Matteli Solutions also includes the engineering group AML Holding a.s., which brings together the manufacturer of coupling technology PANAV and the company CUTCO Steel. In total, the holding companies employ approximately 2,000 people, and the group expects revenues of CZK 6 billion in 2026.
